BREAK OUT ROOM REFLECTIONS: ZOOM CHAT

Is there something that you heard tonight that you hadn't heard before either from someone in your small group or from the presentation, something that is causing you to think differently? Any new ideas?

- There is too great a disconnect between the general areas of Residents and the developed areas around Mall Road. What is the managed plan for this as well?
- River walks! Awesome!
- Underlying water issues
- Surprised with demographics
- What was the impetus for this whole approach to the future in Burlington?
- Convert much parking lots, impervious surfaces to open/green space and parks/gathering places. Riverwalk is great.
- The visual of the parking and how it divided areas was quite shocking
- Ecology at Burlington mall let's explore more....
- Employment demographics and the housing market
- Dead ends that prevent connection
- Develop strong intra-Burlington transit to complement pedestrian access
- I am concerned about the presentation comments that implied to me that sections of the town would

be focused on specific business types. It will hurt us to be overly restrictive.

- I was surprised how much of a lack there was of mid-density residential space
- Was the Master Plan approved?
- The "downtown" area / town center (overlay district) needs attention...it's an eyesore & we NEED to partner w/ building/land-owners to revive this area & make it better!! Signage would help.
- I don't know if it's possible, but more walkable / cyclable connections across (under?) 128 would be impactful
- Same with mall road - these are currently hard barriers
- Being proactive with a vision will give Burlington the ability to better plan and adjust our zoning to accommodate our changing needs. Thank you, Melisa, Kristin and the planning groups for helping to bring this to the forefront of conversation.
- I found the slide about employees coming from north important as future public transit needs are considered.
- I would love to see an MIT satellite here in town.

[Facilitator notes of small group discussions will be forthcoming]
